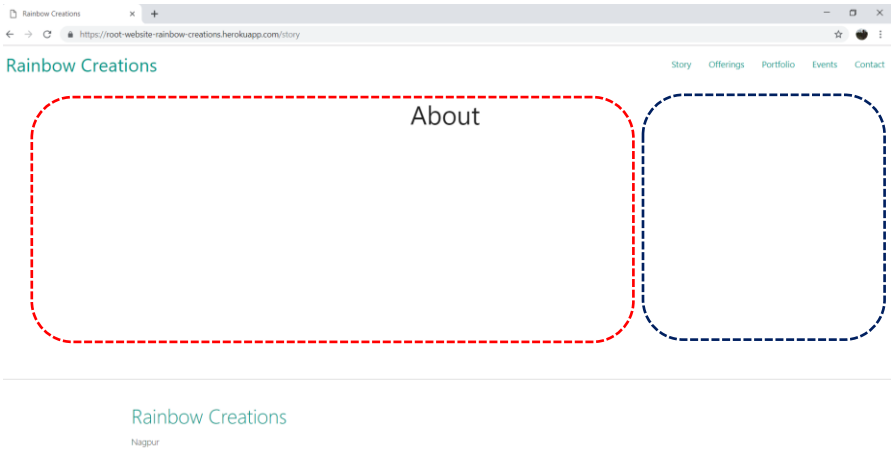
Feedback:

1. Please remove screen shown in below screen shot, so that when one visits the web address, the 'Story' tab should be accessed.

2. In this 'Story' or About Us page, we wish to have few images scrolling horizontally (like a slide show) in the area represented by the dotted red box, almost 3/4th of the screen view, as shown in the below screen shot.
   The remaining 1/4th of the page, blue dotted box, can be utilized to write the paragraph on 'About US'

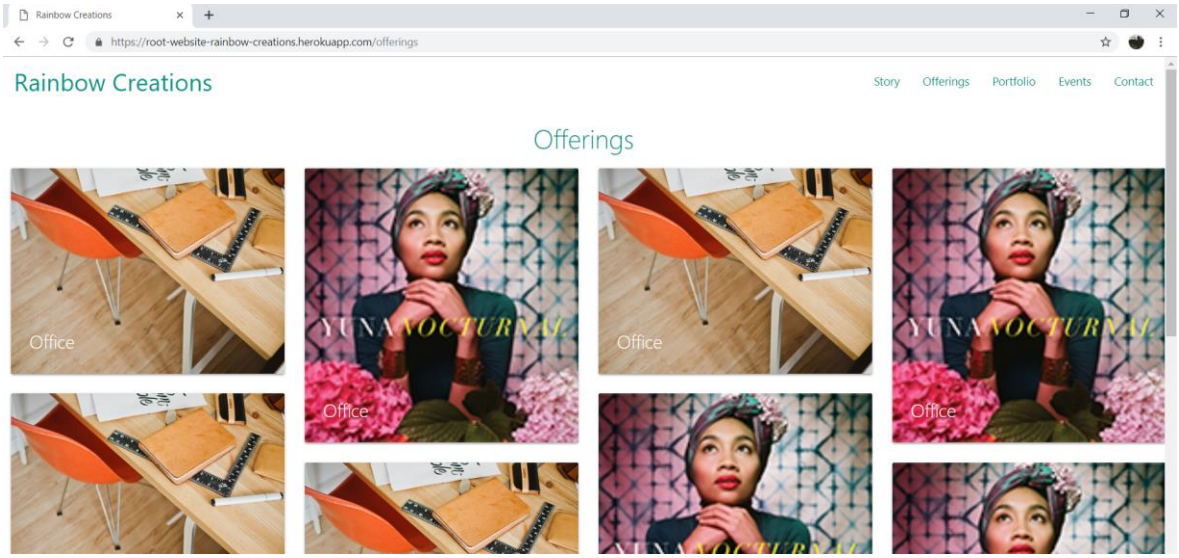


3. When one scrolls till the end of one page or tab, the next page or tab should begin.
   For example, when one scrolls till the end of 'Story' tab, automatically the next tab, that is 'Offerings' should begin.
   Similarly, when one scrolls till the end of the 'Offerings' tab then the next tab that is 'Portfolio' tab should begin.

4. Please change name of Offerings tab to 'Products and Services'

5. When the 'Products and Services' tab is accessed, **for now,** let us have two tiles with images – 1. 1. Wall Art

2. Canvas Painting.
This means, instead of Office Text in the tile with the image of a table and chair, we will have Wall Art image and the name itself. Similarly for Canvas Painting.



6. When one clicks on the tile Wall Art, he is directed to the Portfolios tab, wherein the following tiles would be displayed under the head Wall Art. These contents could also be displayed when one directly visits Portfolios tab

- 1_Schools
- 2_Public Spaces & Organisations
- 3_Residential Spaces
- 4_Restaurants, Hotels
- 5_Private Institutes, Academies
- 6_Private Organisations

When one clicks on the tile Canvas Painting, he is directed to the Portfolios tab, wherein the following tiles would be displayed under the head Canvas Painting. These contents could also be displayed when one directly visits Portfolios tab
